## Probulator

The Probulator - 2 pairs of probes for multimeters etc.(PROB / TM99)

Anyone who has tried to get two voltmeter probes into a loom and get a consistent reading will understand how incredibly useful these devices are. They come in packs of two pairs, each pair a different size .

Special scoop-shaped back probes to allow connection to commonly used bike & automotive connectors. Contains 2 x 2.4mm & 2 x 3.2 mm external diameter probes which connect to standard 4mm multimeter banana plugs, as used in most multimeters, as well as IgnitionMate, which is supplied with these as standard.

**PRODUCT NO: PROB**
