

Case study: Calico Housing

April 2008

KEYSAFE IS REAL LIFESAVER SAYS LANCASHIRE HOUSING ASSOCIATION

One of Supra UK's biggest customers is Burnley based Housing Association, Calico. To date, they have ordered in excess of 1,000 GE KeySafe products for their residents.

As the largest landlord in Burnley, Lancashire, they rent out properties ranging from sheltered accommodation to hostels to affordable family homes for those in most need. Some of their tenants also use pendant alarms to summon aid in the case of extreme emergencies.

Anne Marie Sanders from Calico Housing commented: 'The profile of our tenants and their needs is very broad. Many are independent and can look after themselves, but others are not so fortunate and need pendant alarms for emergencies. Historically, gaining access to these properties in such emergencies proved very difficult and expensive and often involved the services having to use forced entry.

'Now that we have GE KeySafes™ installed in these locations, I believe it is because of them that we have literally saved lives because those emergency services have been able to gain immediate access at the crucial time. I would have no hesitation in recommending GM KeySafe™ from Supra to other organisation who are faced with similar circumstances'.

David Ogden, managing director, Supra UK commented: 'Calico Housing is a very good example of one of our typical customers. Key safes have proven equally popular with social services, carers, daily nursing staff and of course police and paramedics who need to gain access when it is most needed. The real advantage of GE KeySafe™ is that the keys never leave the property, assuring access 24 hours a day'.
